

THE ANNUAL CONFERENCE OF SISNM
TARGETED THERAPY IN ONCOLOGY
August 16-18, 2013

Department of Nuclear Medicine
Kovai Medical Center and Hospital

www.sisnm13.com

WARMTH

Welcome to the First Annual Conference of SISNM

It is our privilege to host the very first Annual Conference of SISNM and hope you have a great time, when in Coimbatore.

The focus for this year conference is the increasing role played by Nuclear Medicine in Oncology Therapy. The meeting would be a platform for Medical / Surgical / Radiation Oncologists and Hematologists to interact with the nuclear medicine fraternity and to explore newer avenues offered by nuclear medicine in Molecular Level Targeted Therapies.

The purpose of this conference is also to bring together the best National and International faculty in each of these disciplines (clinical, radiopharmaceutical industry) and enable every Nuclear Medicine department to undertake specialized therapies back at their hospitals. It is a platform for upcoming and practising oncologists and nuclear medicine physicians to get exposed to evidence based medicine, practised in the best centers of the country and in the world.

Dr. Ajit Shinto
Organizing Secretary

Dr. K.K. Kamaleshwaran
Treasurer

South Indian Society of Nuclear Medicine

Celebrating the vibrant Nuclear medicine community down south, it is our pleasure to unveil South Indian Society of Nuclear Medicine.

Significant contributions have been made by our South Indian colleagues in the field of nuclear medicine and one of the stand out feats of this community has been the excellent academic activities organised.

With an eminent list of stalwarts in the field of nuclear medicine, people who have developed this field down south, who have been the torch bearers of this fledgling , often unappreciated branch of medicine, be it technologists, physicians, clinicians; this society has espoused only the furthering of the clinical impact of nuclear medicine.

Dr. K. Vanitha
President

Dr. Satishnath
Secretary

Dr. R. Krishnakumar
Joint Secretary & Treasurer

I am glad to know that South Indian Society Nuclear Medicine is organizing its 1st Annual Conference at Coimbatore during 16-18 August, 2013 on TARGETED THERAPY ONCOLOGY. This conference will bring together academics, scientists, radiatic oncologists, hematologists and nuclear medicine physician from across the globe to

discuss innovations in radiopharmaceutical development, target selection and the impact of new discoveries in molecular biology.

Over the years, diagnosis, response assessment and treatment of patients with cancer have shifted from the traditional agents to therapeutic interventions that work at molecular level by biological mechanisms. Targeted therapies at molecular level derive therapeutic advantage by interacting with key molecular sites and receptors on the target tissue. The newer imaging techniques that allow detection of functions and processes that occur at submicroscopic or molecular level can now be useful as therapies for diagnosis, treatment planning and response assessment in malignant diseases. There will be plenty more to add on targeted therapies in the coming years as we have entered into the "molecular oncology era".

To meet the need for clinical demands, Bhabha Atomic Research Centre, Mumbai will continue to play a pivotal role in the development of different types of diagnostic and therapeutic radiopharmaceuticals and supply to the user hospitals.

I am sure that this conference will be an enriching experience both for the basic scientists, clinicians, radiopharmacists and physicians actively involved in molecular imaging, targeted radionuclide therapy and drug development. I congratulate South Indian Society of Nuclear Medicine for organizing this very important conference and wish the conference success.

Dr. Gursharan Singh

Associate Director (I) & Head
Isotope Applications and Radiopharmaceuticals Division
Radiochemistry and Isotope Group
Bhabha Atomic Research Centre, Mumbai

World Association of Radiopharmaceutical & Molecular Therapy

WARMTH

World Association of Radiopharmaceutical & Molecular Therapy (WARMTH) is an International Organization with stakeholders from all fields of nuclear medicine and several allied clinical specialties, e.g., Nuclear Medicine Physicians, Radio-chemists, Physicists, Oncologists, Rheumatologists, Endocrinologists, Surgeons and Pathologists, who share research commitments to, and clinical practice in therapeutic nuclear medicine. The major objectives of the WARMTH include setting standards for provision of radiopharmaceutical therapy, particularly in the development of uniform protocols for clinical practice of therapeutic nuclear medicine worldwide.

Dear Dr.Aisyah Elliyanti,

It is with great pleasure that the organizing committee of TARGETED THERAPY IN ONCOLOGY, SISNM-13 would like to convey the acceptance of your abstract , titled "**DIFFERENTIATED THYROID CANCER LOSS ABILITY TO ACCUMULATE RADIOIODINE: A CASE REPORT**" for **Presentation** under **COMPETITION CATEGORY** .

This decision has been arrived at based on the scoring of 3 independent international reviewers who were blinded to the institution and authors; to ensure a fair, unbiased evaluation.

Please note that **Presentation** under **INTERNATIONAL CATEGORY**. You will be given a power point template to upload your presentation as slides, which will be displayed at select locations at the conference venue. In an effort to go green; please note that you may not display any printed poster at the conference.

I request you to please upload your ppt slides online by 30th July 2013. Your login credentials will be sent to you in 1-2 days time for you to upload. Kindly make sure to use the attached powerpoint template. Only PPTs using this attached template are allowed for presentation.

Regards,

Dr. Ajit Shinto
